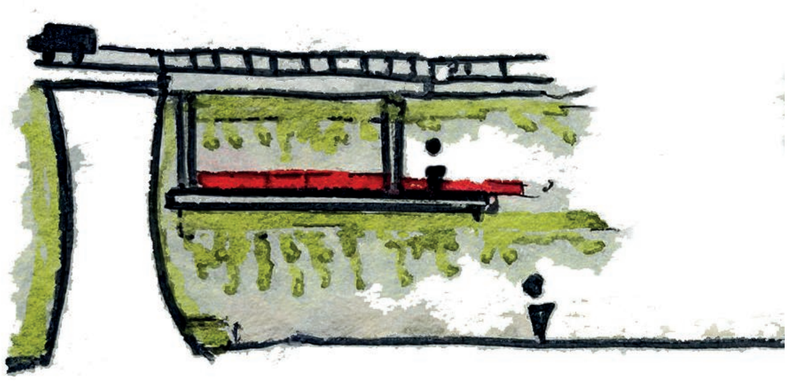
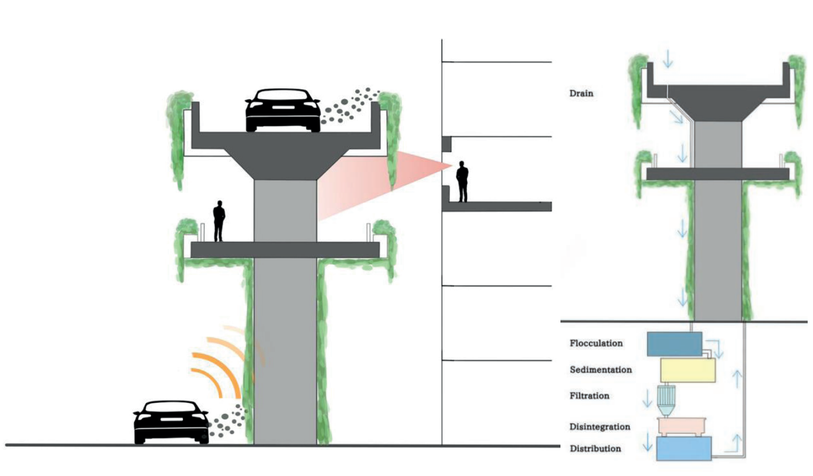
International Urban Forestry Conference 2022

Walk With Integrated Greenery
Community linking



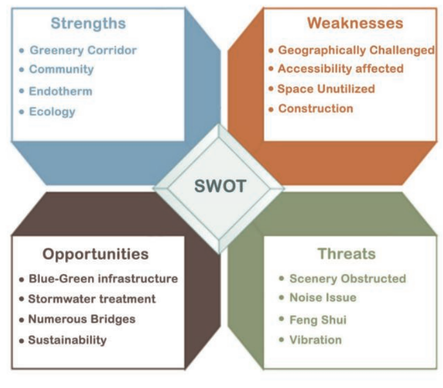


Under bridge pathway

The streets are full of concrete buildings in this busy town, lack plants, and no interaction between people. We hope to find a common element in Hong Kong and design a set of appropriate solutions for it.

Designing a pathway from mid-levels to the seaside with pedestrians and vehicles, increasing plant green communities on the structure of the flyover can reduce noise and heat island effect while adding a new pathway under the bridge. The pathway can also be connected to different activities and facilities on the ground, making it a space that connects residents to entertainment and rest.

Greening in streetscape can create various advantages for communities and pedestrians, making cities and citizens healthier while also making streets more dynamic and attractive. Diversified streetscapes can also create various characteristics and advantages for the place, attracting people to stay in one place longer to experience this urban forest.



Plants	Name	Bloom Period
	Confederate jasmine (Trachelospermum jasminoides)	Flowering from March to June.
	Fire-cracker vine (Pyrostegia venusta)	Flowering from January to June.
	Japanese honeysuckle (Lonicera japonica)	Flowering from April to May.
	Chinese Ixora (Ixora chinensis)	Flowering from June to October, attracts Swallowtails, Whites and Yellows
	Golden Dewdrops (Duranta erecta)	Flowering from May to November, attracts Skippers, Blues, small Whites and Yellows
	Lantana (Lantana camara)	Flowering almost throughout the year, attracts Swallowtails, Skippers, small Whites and Yellows and some Nymphs
	Pentas (Pentas lanceolata)	Flowering from March to November, attracts Swallowtails, Whites and Yellows
