

防風措施報告

樹木管理部門已按照「樹木風險評估及管理安排指引」，透過執行分流系統，完成了樹木風險評估工作。在惡劣天氣過後，部門會按照指引為可能會顯著受到風暴影響的黑色和紅色分流樹木進行巡查工作，以及適時進行緩解措施，保障公眾安全，同時亦顧全到我們城市林務資產的健康。

Precautionary Announcements

Tree Management Departments have complied with the “Guidelines for Tree Risk Assessment and Management Arrangement” (TRAM), in particular those departments implementing the TRIAGE System. This includes actions post-inclement weather such as inspections of black and red CAT I trees along with those showing noticeable impacts from the storm events. Additional mitigation measures will be undertaken as necessary within a practicable timeframe to first ensure public safety, whilst balancing the health conditions of our urban forestry assets.
