

"Microclimate Study of Building Development – Implication of Sky Gardens"

by Dr. Raymond Yau

Chair of Energy Use Expert Panel of Hong Kong Green Building Council (HKGBC)

Fellow and Director, Ove Arup & Partners Hong Kong Ltd

Synopsis:

Microclimate study of building development is generally described. In particular, the effect of sky gardens on air ventilation will be highlighted alongside with its potential thermal benefits.

The application of these studies in sustainable building initiatives will also be examined.
