引言

“發展局綠化、園境及樹木管理組於 2012 年首次出版《樹木園境地圖》系列，向市民介紹香港各區的綠化園境資產。

2025 年增訂版的《樹木園境地圖》旨在讓市民認識綠化園境的新資源，並欣賞及享受綠化空間與樹木帶來的樂趣。

隨著近年的城市發展及舊區活化，各區都增添和更新了不少綠化空間。近期落成的綠化空間在功能、景觀、生態等方面持續優化，並融入藍綠基建元素，以加強面對氣候變化的抗禦性，提升城市的宜居度和可持續發展，並以前瞻性的規劃及設計配合市民身心健康需要。

FOREWORD

The Greening, Landscape and Tree Management Section of the Development Bureau first published the "Tree and Landscape Map" in 2012, with the aim to promote the greening and landscape assets in different parts of Hong Kong to the general public.

The 2025 augmented edition to the "Tree and Landscape Map" aims to foster the understanding on these new green assets, as well as the appreciation and enjoyment by the general public brought by green spaces and trees.

Many green spaces have been formed or refurbished in various districts under recent urban development and renewal. These recently completed green spaces have been further optimised in terms of functionality, landscape quality and ecological consideration by integrating blue green infrastructure elements. The resilience against climate change and the livability and sustainability of the city as a whole has been enhanced. They are planned and designed with visions to address physical and mental health needs of the public.”

觀塘區

Kwun Tong District

九龍東正積極轉型為本港第二個「核心商業區」(CBD2)，其中觀塘區的發展引人注目。這裡不僅有優質商貿進駐，亦同時引入藝術、文化和創意等行業，增添了區域的活力。透過採用富地方色彩的城市設計，以連繫、創新和低碳的設計概念，推動區內主要街道、海濱和其他公眾休憩用地逐步優化，令觀塘區更具吸引力。

Kowloon East is actively transforming into Hong Kong's second Core Business District (CBD2), with notable advancement in the Kwun Tong district. This area has not only settled with premier businesses, but also attracted arts, culture and creativity industries, which in turn enhances the vibrancy of the district. Through strategic urban design that coheres with the local history of Kwun Tong, along with concepts of connectivity, innovation and low carbon, many key streets, waterfront and other public recreational spaces within the district have gradually been revitalised, making the Kwun Tong district more appealing.

觀塘海濱花園 *Kwun Tong Promenade*

佔地超過 4 公頃的觀塘海濱花園提供約 1 公里長的海濱步道、特色塔樓地標、音樂噴泉以及各種設施。另外，為了將自然帶入城市，長廊上種了充滿特色的植物和廣闊的草地。玻璃欄杆無阻市民與大海的距離，我們可飽覽維多利亞港的全景。紙張裝卸是觀塘公共貨物起卸區昔日的日常情景。將廢紙回收再造業的特色融入於建築物當中，令公園設計更別具一格。

Occupying an area of over 4 hectares, Kwun Tong Promenade provides a 1 km long seaside boardwalk, a landmark tower, musical fountains and a variety of other facilities. Designed to bring nature into the city, abundant amount of plants and lawns are provided. Glass balustrades improve visual access to the sea and provide an unobstructed panorama of the Victoria Harbour. Loading and unloading of paper was a daily scene of the former Kwun Tong Public Cargo Working Area. Features representing the paper recycling industry have been blended into the design of facilities which signified the special character of the promenade.

駿業街遊樂場 **InPARK**

InPARK（工業公園）是一個以工業風為主題的公園，設有露天的藝術展覽園地。這裏原名駿業街遊樂場，是一個面積約達 8,440 平方米的典型硬地球場，主要服務當時觀塘工業區的工人。隨着該區近年的轉型，遊樂場進行了兩期改善工程，吸引在附近工商大廈的上班一族在工餘時間舒展身心。

InPARK, which stands for Industrial Park, is a park designed in an industrial theme with open-air galleries. The site was formerly a traditional hard paved ballcourt known as Tsun Yip Street Playground with a total area of about 8,440 m². The park was initially built to serve factory workers around the Kwun Tong Industrial Area. Since the transformation of the district in recent years, the park has undergone two phases of renovation works. It attracts office workers from nearby commercial and industrial buildings to visit and unwind during their breaks.

KT
02

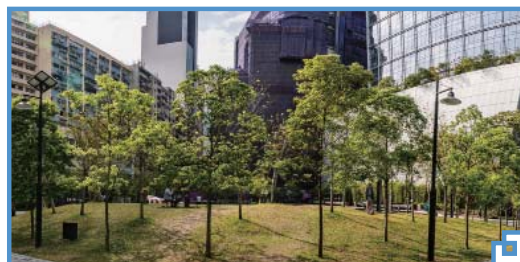

駿業街遊樂場

InPARK

InPARK 在人煙稠密的商業區發揮綠肺功能，並為在附近工作或生活的市民提供一個寧靜空間。
InPARK serves as a "green lung" in the densely-built commercial area, offering a place of serenity for users working or living in the neighbourhood.

2

開闊的草坪不對稱地微微向草坪邊緣傾斜，種在外圍的樹木間距較疏，為休閒活動留出空間，並讓充足的陽光穿透樹冠。

The lawn is asymmetrically sloping towards the edge of Central Lawn, surrounded by sparse trees to leave room for leisure activities and let adequate sunlight penetrate through the tree canopies.

3

高大的樹木遮擋了公園外圍的商業大廈，亦包圍着中央草坪。在城東誌旁種植的竹樹形成一個建築環境向毗鄰綠肺過渡的空間。

Tall trees screen the commercial buildings and at the same time enclose the central lawn. The bamboo planted along Landmark East creates a transition from the built environment to the neighbourhood's green-lung.

4

多功能廣場設有籃球場，為各種活動提供了充滿活力的空間。

The Multi-purpose Square, featuring a half basketball court, offers a vibrant space for various active activities.

「駿業街遊樂場公共藝術計劃」於 2016 年 9 月展開，向本地藝術家及團隊公開徵集藝術作品提案，為「InPARK」添置公共藝術作品。

The "Public Art Scheme of Tsun Yip Street Playground" was launched in September 2016 to select public artworks for the InPARK through an open call for proposals from local artists and art groups.

■ 《織織綠織織》
"The Fabric Green"

織線用了可再生物料製造，織出具標誌性的「綠」布，寓意紡織行業邁向綠色產業的新動力。

The installation was created using recyclable materials that form a "green" fabric to signify the current trend in the textile industry of "going green".

■ 《花樣年華》
"Stitching Memories"

作品除了表達對投放著寶貴青春的女工們一份謝意，亦表揚她們對社會經濟發展作出的巨大貢獻。

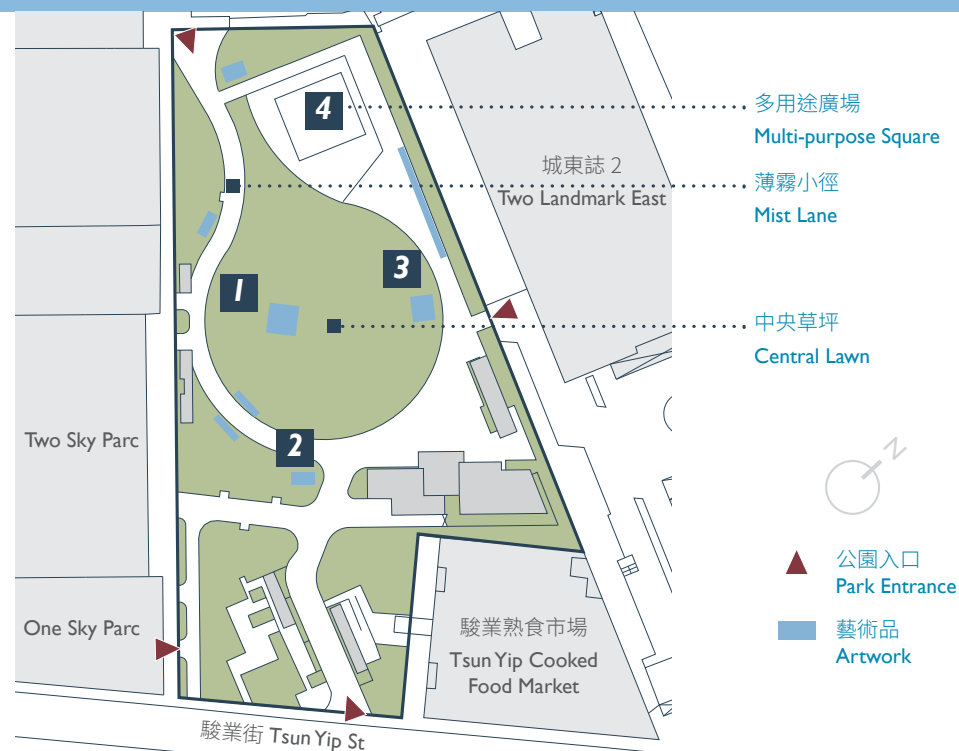

The installation was a token of gratitude to women who spent their youth by the sewing machines, and honoured their significant contributions to the social and economic developments of the local community.

■ 《沉球》
"Cam4 Kau4"

「沉球」改變西瓜波的物料及形狀讓市民以坐、臥、倚靠的形式使用；而凹陷及埋藏的形態，代表着我們對過去的遺忘。

The shapes and materials of the "watermelon balls" were transformed for this sculpture so that people can sit, lay and lean on them. The balls, which appear to be deflated and sinking into the earth, represent traditions and old memories that have been forgotten.

海濱道公園

Hoi Bun Road Park

海濱道公園原建於 1990 年，面積約 9,300 平方米，主要服務區內的工作人口。為配合九龍東轉型為另一個核心商業區，公園於 2021 年已完成翻新工程以配合市民大眾不斷轉變的需要。透過改善海濱道公園及沿路的街道面貌和過路設施，觀塘商業區和海濱得以連繫，將區內的人流及活力注入觀塘海濱花園一帶。改造後其中一個特色是巧妙利用綠籬、涼亭、屏風等設施分隔開街道的繁囂，同時保留背後富變化的城市景觀，為中央草坪營造理想氛圍。

Hoi Bun Road Park was built in 1990, with an area of about 9,300 m², mainly to serve the working population in the area. To facilitate the transformation of East Kowloon to another central business district, the Park was refurbished in 2021 to cater for the changing needs of the general public. Through upgrading of the Park, streetscapes and road crossing facilities along Hoi Bun Road, the connection of Kwun Tong commercial district and the promenade has been enhanced, which draws visitors from the neighbourhood and energises the Kwun Tong Promenade. The refurbished Park strategically screens off noise from street background with greenery, screening panels, pavilions and other ancillary facilities, while preserving the vibrant urban landscape as a backdrop and creating an ideal atmosphere for the central lawn.

翠屏河畔長廊 *Tsui Ping Riverside Promenade*

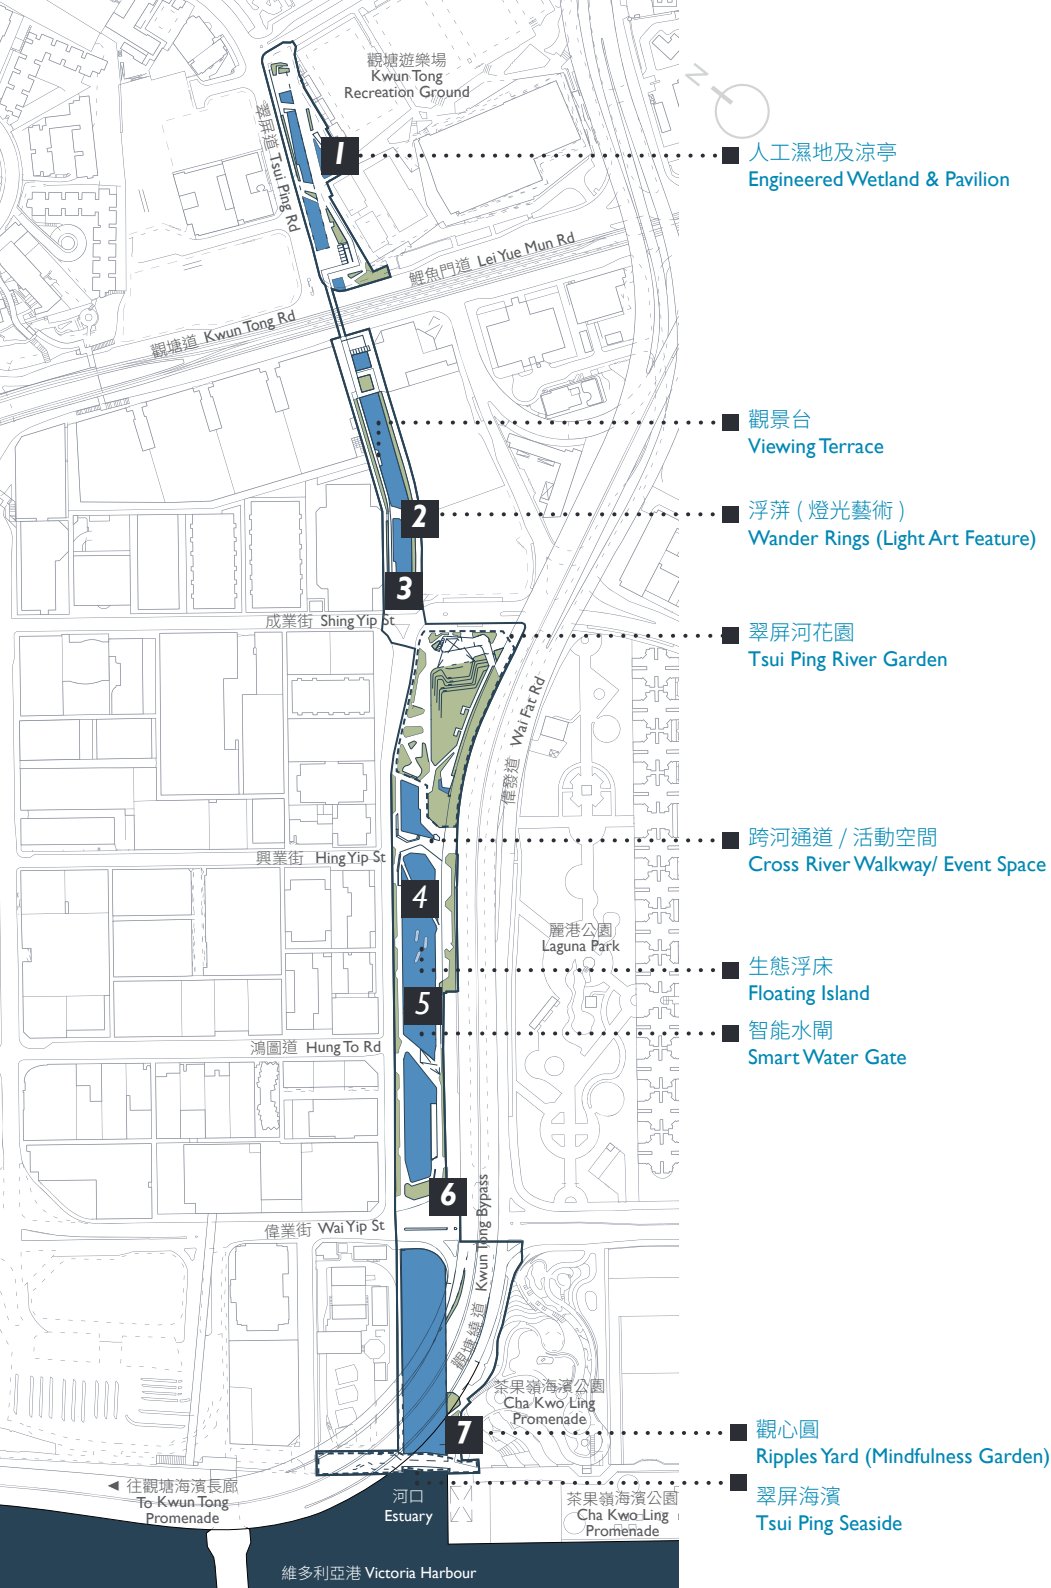

「活化翠屏河」項目實踐「河畔城市」概念，提升河道生態及景觀設計，活化全長約1公里的翠屏河畔長廊，提供河畔公共空間及以新建跨河通道加強區內連繫。項目亦挖深翠屏道至敬業街一段河床，在河道上游安裝擋水牆，以提升河道防洪能力，並降低觀塘區的水浸風險。此外，翠屏河花園亦為河畔提供一個中型的休憩空間，而河口的翠屏海濱跨河通道，則貫通了茶果嶺及觀塘海濱。

Revitalisation of Tsui Ping River project implemented "Rivers in the City" concept by enhancing river ecology and landscape design. The 1 km long Tsui Ping Riverside Promenade provides a riverside public space and cross-river pedestrian walkways to improve connectivity within the district. The project has also increased the river's flood carrying capacity and reduced the flood risk of Kwun Tong District by deepening a portion of the riverbed from Tsui Ping Road to King Yip Street, and by installing flood walls upstream. Furthermore, the Tsui Ping River Garden provides a medium-sized recreational ground for the riverfront, while the cross river walkway at the Tsui Ping Seaside links the Cha Kwo Ling and Kwun Tong waterfront as one.

黃大仙區 Wong Tai Sin District

黃大仙區公私營住宅林立。近年，區內積極提升排洪基建，打造綠化河道走廊，營造更佳的行人環境，並創造高質素的休憩空間。讓市民無論是在步行、閒坐還是放鬆的時刻，都能享受到宜人的綠化公共空間。

Wong Tai Sin district features a variety of public and private housing developments. In recent years, the district has made significant strides in upgrading its drainage infrastructure, creating green river corridors, enhancing the pedestrian environment and establishing quality recreational spaces. Residents can enjoy pleasant green public spaces, while they are walking, sitting out, or simply relaxing within the district.

啟德河
Kai Tak River

WTS
01

啟德河 Kai Tak River

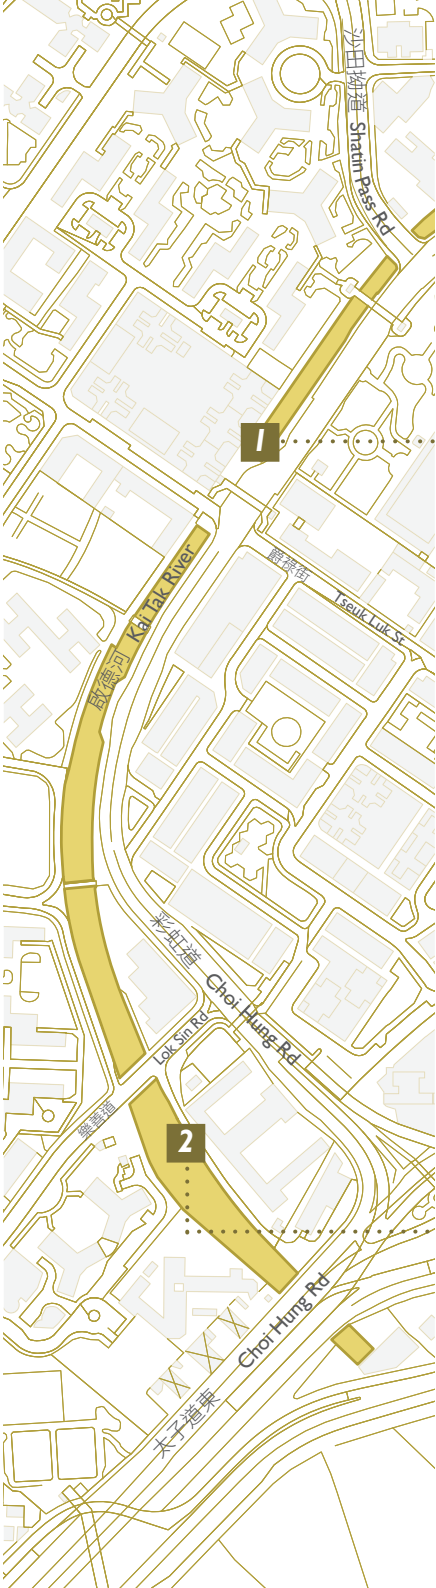

啟德河舊稱為啟德明渠，總長約 2.4 公里，是東九龍其中一條主要排洪渠道。由於受近年城市發展及極端天氣影響，彩虹道在暴雨期間曾出現嚴重水浸，影響附近居民生活。為提升啟德河的排洪能力及減低相關地區的水浸風險，渠務署於 2011 年 10 月起於黃大仙區內展開長 1.1 公里的渠段改善工程，並於 2018 年完成及開放沿河路徑予市民享用。

Known as Kai Tak Nullah in the past, the approximate 2.4 km long Kai Tak River is one of the East Kowloon's major drainage channels. Due to urban developments and extreme weather conditions in recent years, serious flooding occurred in Choi Hung Road during rainstorms, affecting nearby residents. In order to increase the drainage capacity of Kai Tak River and mitigate flooding risk of surrounded area, the Drainage Services Department implemented river improvement works in stages to improve the 1.1 km section of the nullah in Wong Tai Sin district since October 2011. These improvement works were completed in 2018 and with trail along the river opened to public for enjoyment.
