# 引言

“發展局綠化、園境及樹木管理組於 2012 年首次出版《樹木園境地圖》系列，向市民介紹香港各區的綠化園境資產。

2025 年增訂版的《樹木園境地圖》旨在讓市民認識綠化園境的新資源，並欣賞及享受綠化空間與樹木帶來的樂趣。

隨著近年的城市發展及舊區活化，各區都增添和更新了不少綠化空間。近期落成的綠化空間在功能、景觀、生態等方面持續優化，並融入藍綠基建元素，以加強面對氣候變化的抗禦性，提升城市的宜居度和可持續發展，並以前瞻性的規劃及設計配合市民身心健康需要。

## FOREWORD

The Greening, Landscape and Tree Management Section of the Development Bureau first published the "Tree and Landscape Map" in 2012, with the aim to promote the greening and landscape assets in different parts of Hong Kong to the general public.

The 2025 augmented edition to the "Tree and Landscape Map" aims to foster the understanding on these new green assets, as well as the appreciation and enjoyment by the general public brought by green spaces and trees.

Many green spaces have been formed or refurbished in various districts under recent urban development and renewal. These recently completed green spaces have been further optimised in terms of functionality, landscape quality and ecological consideration by integrating blue green infrastructure elements. The resilience against climate change and the livability and sustainability of the city as a whole has been enhanced. They are planned and designed with visions to address physical and mental health needs of the public.”

# 觀塘區

Kwun Tong District

九龍東正積極轉型為本港第二個「核心商業區」(CBD2)，其中觀塘區的發展引人注目。這裡不僅有優質商貿進駐，亦同時引入藝術、文化和創意等行業，增添了區域的活力。透過採用富地方色彩的城市設計，以連繫、創新和低碳的設計概念，推動區內主要街道、海濱和其他公眾休憩用地逐步優化，令觀塘區更具吸引力。

Kowloon East is actively transforming into Hong Kong's second Core Business District (CBD2), with notable advancement in the Kwun Tong district. This area has not only settled with premier businesses, but also attracted arts, culture and creativity industries, which in turn enhances the vibrancy of the district. Through strategic urban design that coheres with the local history of Kwun Tong, along with concepts of connectivity, innovation and low carbon, many key streets, waterfront and other public recreational spaces within the district have gradually been revitalised, making the Kwun Tong district more appealing.

## 觀塘海濱花園 *Kwun Tong Promenade*

佔地超過 4 公頃的觀塘海濱花園提供約 1 公里長的海濱步道、特色塔樓地標、音樂噴泉以及各種設施。另外，為了將自然帶入城市，長廊上種了充滿特色的植物和廣闊的草地。玻璃欄杆無阻市民與大海的距離，我們可飽覽維多利亞港的全景。紙張裝卸是觀塘公共貨物起卸區昔日的日常情景。將廢紙回收再造業的特色融入於建築物當中，令公園設計更別具一格。

Occupying an area of over 4 hectares, Kwun Tong Promenade provides a 1 km long seaside boardwalk, a landmark tower, musical fountains and a variety of other facilities. Designed to bring nature into the city, abundant amount of plants and lawns are provided. Glass balustrades improve visual access to the sea and provide an unobstructed panorama of the Victoria Harbour. Loading and unloading of paper was a daily scene of the former Kwun Tong Public Cargo Working Area. Features representing the paper recycling industry have been blended into the design of facilities which signified the special character of the promenade.

KT  
01

觀塘海濱花園

Kwun Tong Promenade

園境的建築物反映了海濱花園前身為公眾貨物裝卸區的特色，貫徹樸素、工業風的風格。左圖的棚架外形設計的靈感來自碼頭舊船裝卸廢紙的起重架，反映觀塘公眾貨物裝卸區的歷史及當時碼頭的用途。

The structures in the landscape reflect the character of the former industrial use of the area. The shapes of the trellis on the left was inspired by cargo container cranes for loading and unloading waste paper, reflecting the history of the former Kwun Tong Public Cargo Working Area.

傍晚時分，沿著海濱長廊踏單車，能欣賞日落的美景，天空和海港都染上一片瑰麗的橘黃金色。

A bike ride along the promenade during the evening provides sweeping views of the harbour under a golden sky at sunset.

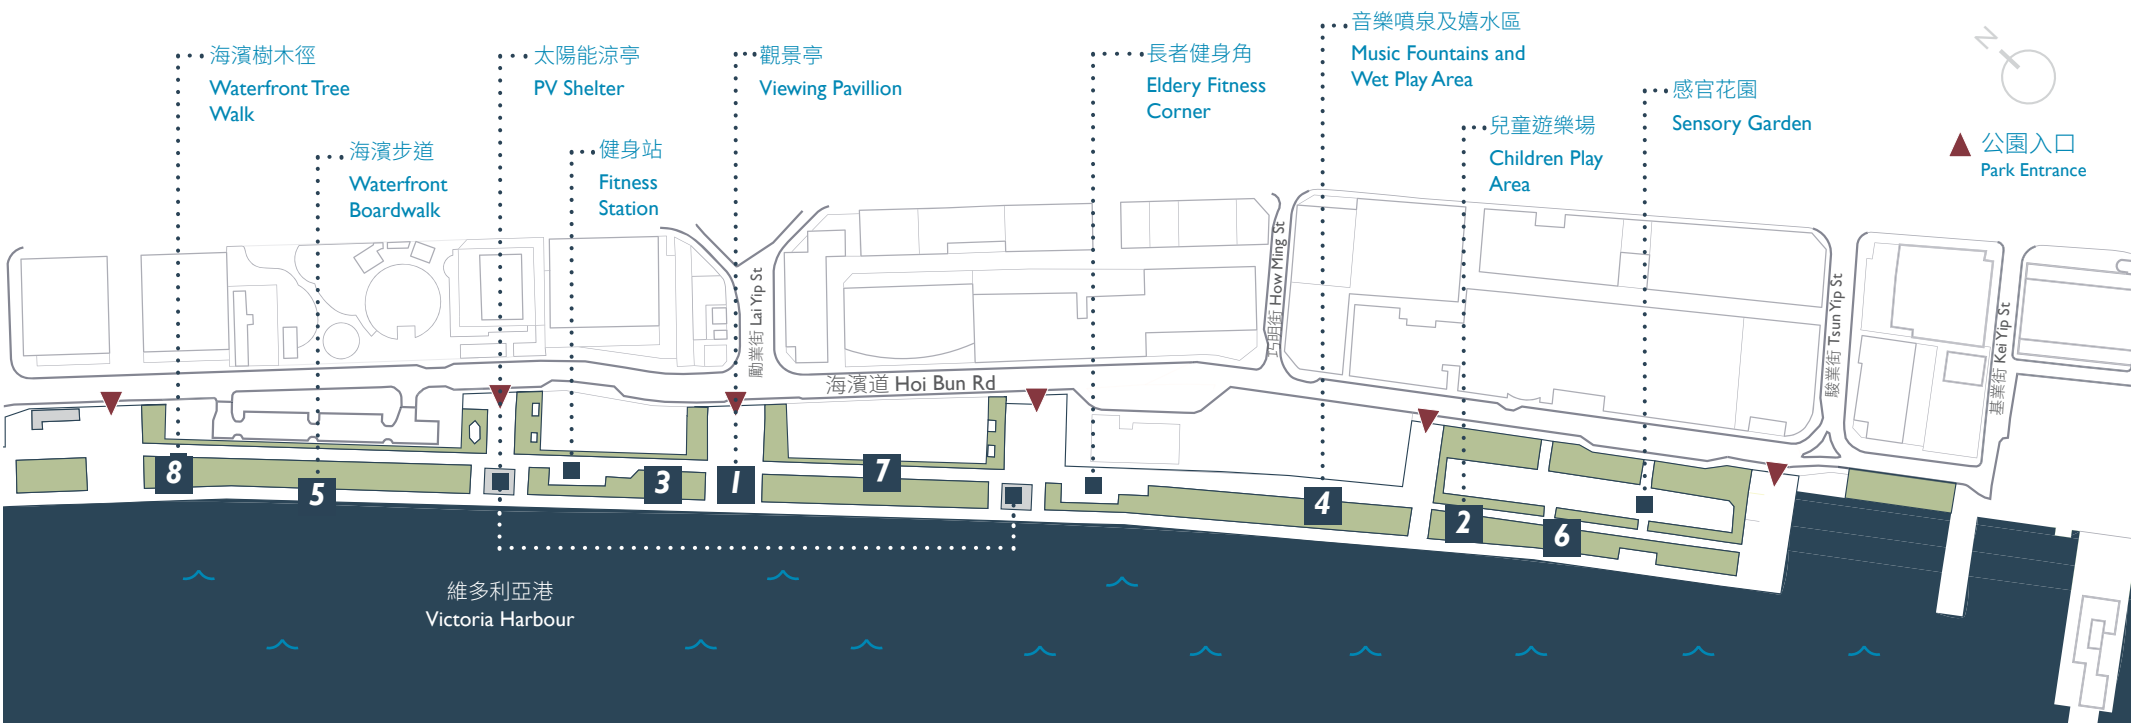

音樂噴泉富有動感的射燈效果與觀塘的燈光及霓虹燈互相輝映，構成美輪美奐的夜景。

The animated lighting effects of the music fountains combined with lighting of the district create spectacular night scenes.

園內海濱步道全長約 1 公里，是跑步的好去處。

The 1 km long waterfront boardwalk is a popular jogging spot.

## 駿業街遊樂場 *InPARK*

InPARK（工業公園）是一個以工業風為主題的公園，設有露天的藝術展覽園地。這裏原名駿業街遊樂場，是一個面積約達 8,440 平方米的典型硬地球場，主要服務當時觀塘工業區的工人。隨着該區近年的轉型，遊樂場進行了兩期改善工程，吸引在附近工商大廈的上班一族在工餘時間舒展身心。

InPARK, which stands for Industrial Park, is a park designed in an industrial theme with open-air galleries. The site was formerly a traditional hard paved ballcourt known as Tsun Yip Street Playground with a total area of about 8,440 m<sup>2</sup>. The park was initially built to serve factory workers around the Kwun Tong Industrial Area. Since the transformation of the district in recent years, the park has undergone two phases of renovation works. It attracts office workers from nearby commercial and industrial buildings to visit and unwind during their breaks.

KT  
02

駿業街遊樂場

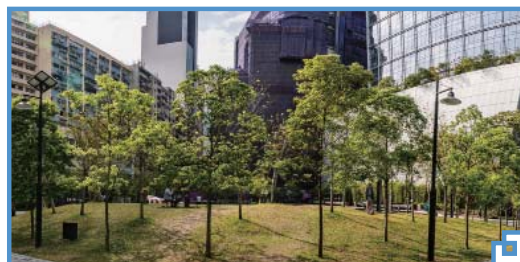

InPARK

InPARK 在人煙稠密的商業區發揮綠肺功能，並為在附近工作或生活的市民提供一個寧靜空間。  
InPARK serves as a "green lung" in the densely-built commercial area, offering a place of serenity for users working or living in the neighbourhood.

2

開闊的草坪不對稱地微微向草坪邊緣傾斜，種在外圍的樹木間距較疏，為休閒活動留出空間，並讓充足的陽光穿透樹冠。

The lawn is asymmetrically sloping towards the edge of Central Lawn, surrounded by sparse trees to leave room for leisure activities and let adequate sunlight penetrate through the tree canopies.

3

高大的樹木遮擋了公園外圍的商業大廈，亦包圍着中央草坪。在城東誌旁種植的竹樹形成一個建築環境向毗鄰綠肺過渡的空間。

Tall trees screen the commercial buildings and at the same time enclose the central lawn. The bamboo planted along Landmark East creates a transition from the built environment to the neighbourhood's green-lung.

4

多功能廣場設有籃球場，為各種活動提供了充滿活力的空間。

The Multi-purpose Square, featuring a half basketball court, offers a vibrant space for various active activities.

「駿業街遊樂場公共藝術計劃」於 2016 年 9 月展開，向本地藝術家及團隊公開徵集藝術作品提案，為「InPARK」添置公共藝術作品。

The "Public Art Scheme of Tsun Yip Street Playground" was launched in September 2016 to select public artworks for the InPARK through an open call for proposals from local artists and art groups.

■ 《織織綠織織》  
"The Fabric Green"

織線用了可再造物料製造，織出具標誌性的「綠」布，寓意紡織行業邁向綠色產業的新動力。

The installation was created using recyclable materials that form a "green" fabric to signify the current trend in the textile industry of "going green".

■ 《花樣年華》  
"Stitching Memories"

作品除了表達對投放著寶貴青春的女工們一份謝意，亦表揚她們對社會經濟發展作出的巨大貢獻。

The installation was a token of gratitude to women who spent their youth by the sewing machines, and honoured their significant contributions to the social and economic developments of the local community.

■ 《沉球》  
"Cam4 Kau4"

「沉球」改變西瓜波的物料及形狀讓市民以坐、臥、倚靠的形式使用；而凹陷及埋藏的形態，代表着我們對過去的遺忘。

The shapes and materials of the "watermelon balls" were transformed for this sculpture so that people can sit, lay and lean on them. The balls, which appear to be deflated and sinking into the earth, represent traditions and old memories that have been forgotten.

## 海濱道公園

### *Hoi Bun Road Park*

海濱道公園原建於 1990 年，面積約 9,300 平方米，主要服務區內的工作人口。為配合九龍東轉型為另一個核心商業區，公園於 2021 年已完成翻新工程以配合市民大眾不斷轉變的需要。透過改善海濱道公園及沿路的街道面貌和過路設施，觀塘商業區和海濱得以連繫，將區內的人流及活力注入觀塘海濱花園一帶。改造後其中一個特色是巧妙利用綠籬、涼亭、屏風等設施分隔開街道的繁囂，同時保留背後富變化的城市景觀，為中央草坪營造理想氛圍。

Hoi Bun Road Park was built in 1990, with an area of about 9,300 m<sup>2</sup>, mainly to serve the working population in the area. To facilitate the transformation of East Kowloon to another central business district, the Park was refurbished in 2021 to cater for the changing needs of the general public. Through upgrading of the Park, streetscapes and road crossing facilities along Hoi Bun Road, the connection of Kwun Tong commercial district and the promenade has been enhanced, which draws visitors from the neighbourhood and energises the Kwun Tong Promenade. The refurbished Park strategically screens off noise from street background with greenery, screening panels, pavilions and other ancillary facilities, while preserving the vibrant urban landscape as a backdrop and creating an ideal atmosphere for the central lawn.

## 茶果嶺海濱公園 *Cha Kwo Ling Promenade*

為配合觀塘區的未來發展，渠務署進行觀塘污水泵房優化工程，興建地底污水調節設施，以提升處理污水的效能。為落實「一地多用」的政策倡議，署方於泵房上蓋建造園境平台，連同毗鄰的海濱空間組成佔地約 1.8 公頃的茶果嶺海濱公園。

To cater for the future development of the Kwun Tong district, the Drainage Services Department (DSD) implemented enhancement works for the Kwun Tong Sewage Pumping Station (KTSPS). An underground balancing facility was constructed to improve the efficiency of sewage treatment capacity. In response to the "single site, multiple use" initiative, DSD transformed the rooftop of the pumping station into a landscaped green platform, which connects with the adjacent waterfront area to form the 1.8 hectare Cha Kwo Ling Promenade.

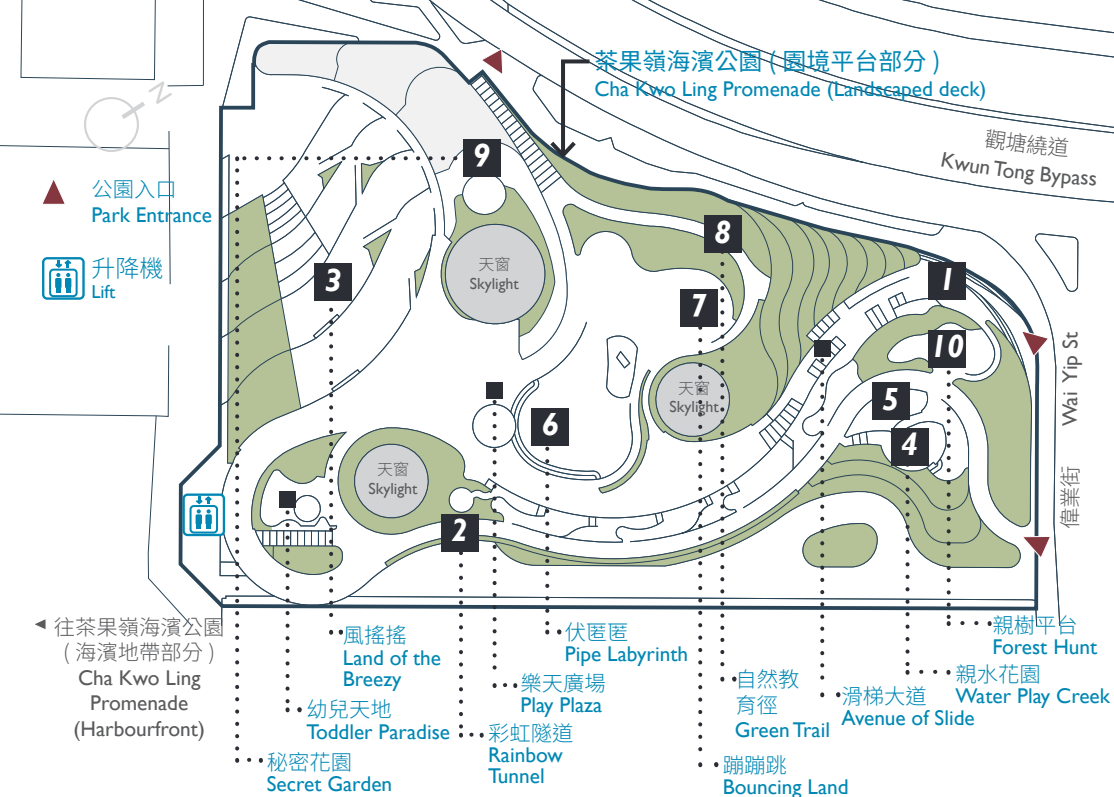

KT

## 翠屏河畔長廊 *Tsui Ping Riverside Promenade*

「活化翠屏河」項目實踐「河畔城市」概念，提升河道生態及景觀設計，活化全長約1公里的翠屏河畔長廊，提供河畔公共空間及以新建跨河通道加強區內連繫。項目亦挖深翠屏道至敬業街一段河床，在河道上游安裝擋水牆，以提升河道防洪能力，並降低觀塘區的水浸風險。此外，翠屏河花園亦為河畔提供一個中型的休憩空間，而河口的翠屏海濱跨河通道，則貫通了茶果嶺及觀塘海濱。

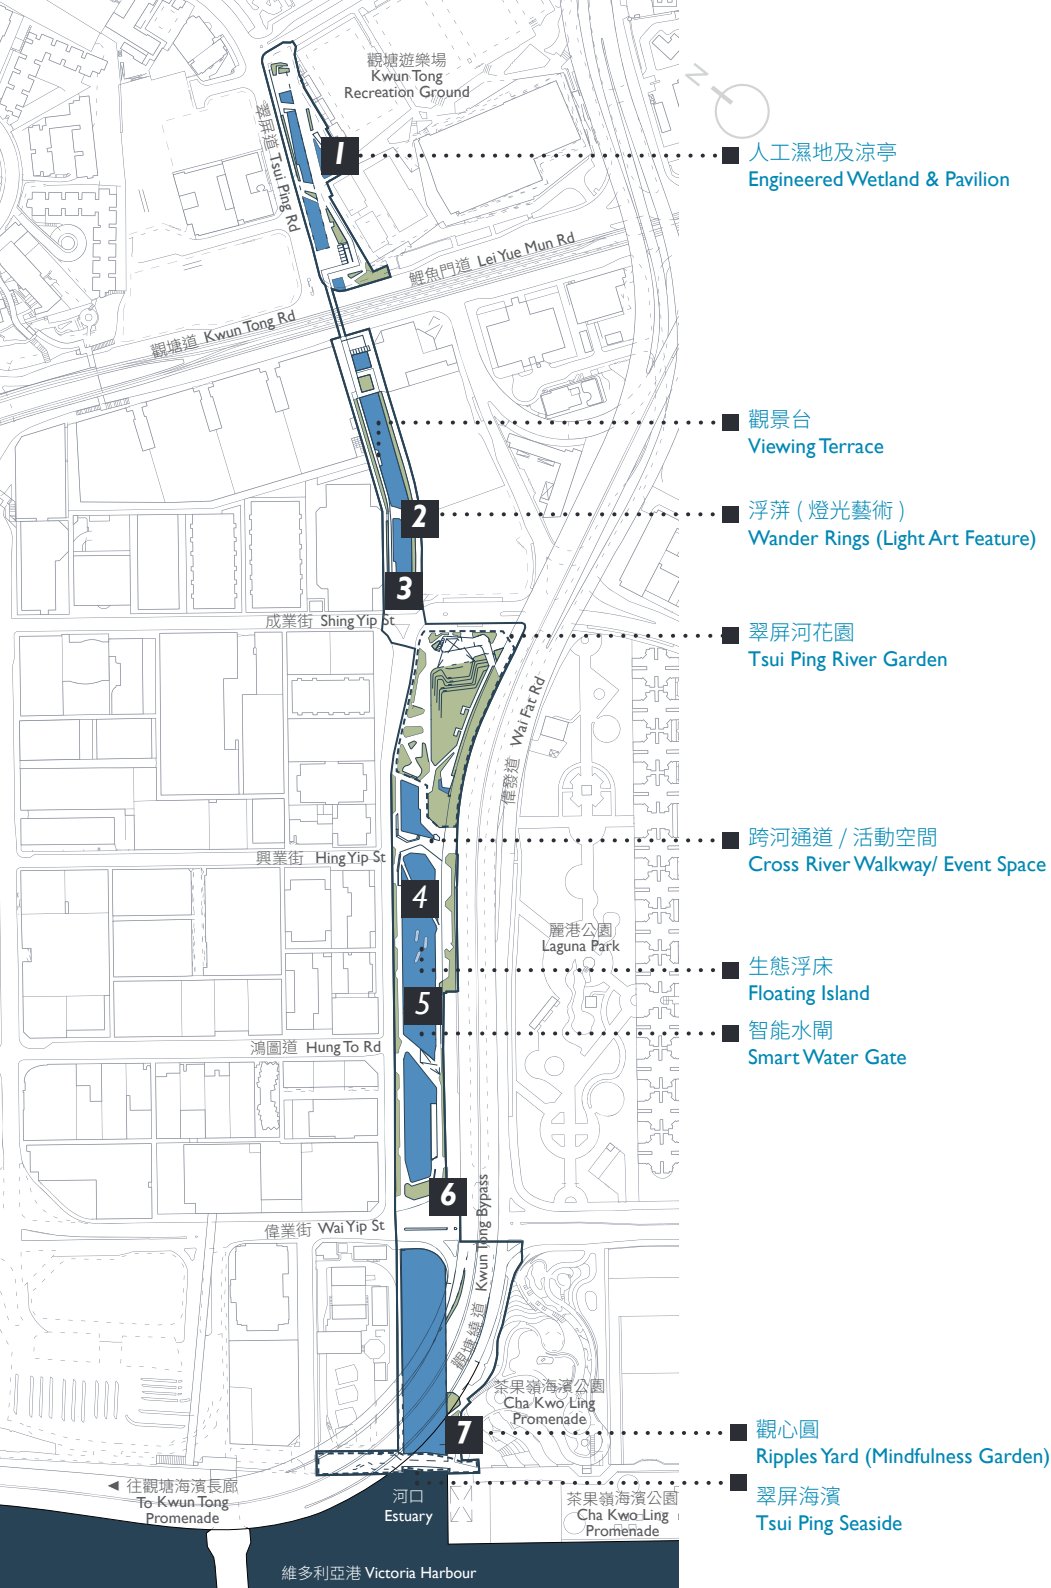

Revitalisation of Tsui Ping River project implemented "Rivers in the City" concept by enhancing river ecology and landscape design. The 1 km long Tsui Ping Riverside Promenade provides a riverside public space and cross-river pedestrian walkways to improve connectivity within the district. The project has also increased the river's flood carrying capacity and reduced the flood risk of Kwun Tong District by deepening a portion of the riverbed from Tsui Ping Road to King Yip Street, and by installing flood walls upstream. Furthermore, the Tsui Ping River Garden provides a medium-sized recreational ground for the riverfront, while the cross river walkway at the Tsui Ping Seaside links the Cha Kwo Ling and Kwun Tong waterfront as one.

KT

Tsui Ping Riverside Promenade

啟德河  
Kai Tak River

## 黃大仙區 Wong Tai Sin District

黃大仙區公私營住宅林立。近年，區內積極提升排洪基建，打造綠化河道走廊，營造更佳的行人環境，並創造高質素的休憩空間。讓市民無論是在步行、閒坐還是放鬆的時刻，都能享受到宜人的綠化公共空間。

Wong Tai Sin district features a variety of public and private housing developments. In recent years, the district has made significant strides in upgrading its drainage infrastructure, creating green river corridors, enhancing the pedestrian environment and establishing quality recreational spaces. Residents can enjoy pleasant green public spaces, while they are walking, sitting out, or simply relaxing within the district.

WTS  
01

## 啟德河 Kai Tak River

啟德河舊稱為啟德明渠，總長約 2.4 公里，是東九龍其中一條主要排洪渠道。由於受近年城市發展及極端天氣影響，彩虹道在暴雨期間曾出現嚴重水浸，影響附近居民生活。為提升啟德河的排洪能力及減低相關地區的水浸風險，渠務署於 2011 年 10 月起於黃大仙區內展開長 1.1 公里的渠段改善工程，並於 2018 年完成及開放沿河路徑予市民享用。

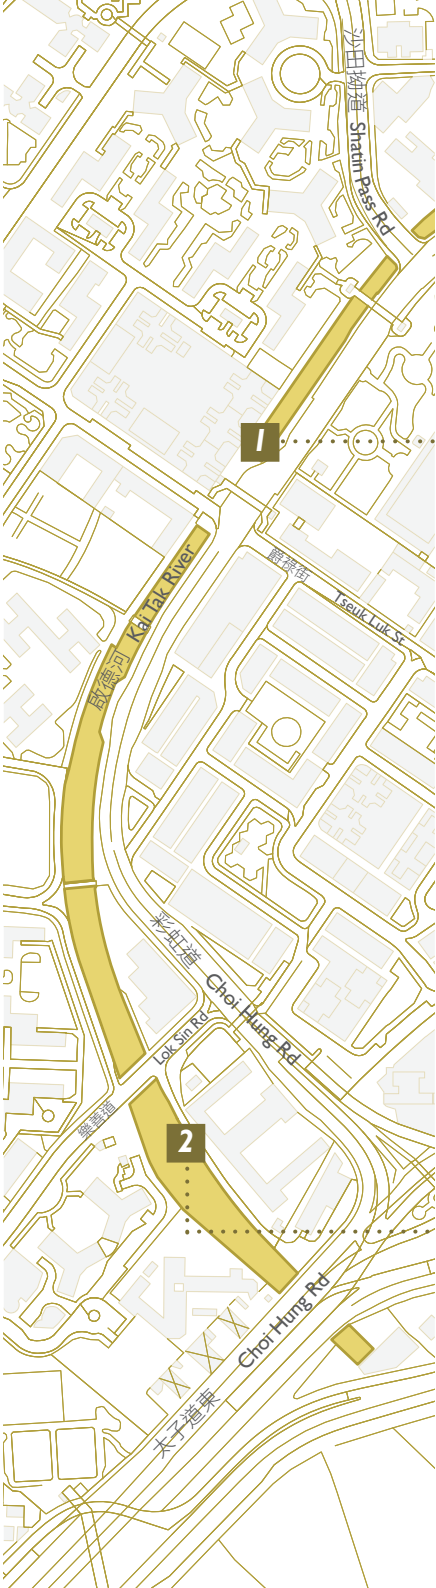

Known as Kai Tak Nullah in the past, the approximate 2.4 km long Kai Tak River is one of the East Kowloon's major drainage channels. Due to urban developments and extreme weather conditions in recent years, serious flooding occurred in Choi Hung Road during rainstorms, affecting nearby residents. In order to increase the drainage capacity of Kai Tak River and mitigate flooding risk of surrounded area, the Drainage Services Department implemented river improvement works in stages to improve the 1.1 km section of the nullah in Wong Tai Sin district since October 2011. These improvement works were completed in 2018 and with trail along the river opened to public for enjoyment.

## 啟德郵輪碼頭公園

### Kai Tak Cruise Terminal Park

啟德郵輪碼頭公園位於啟德郵輪碼頭頂層平台，面積達 23,000 平方米，園內設有多項設施，包括中央草坪、水景花園及噴泉廣場等。公園擁有 360 度的環迴景致，香港島、維多利亞港及九龍的風景一覽無遺，平台上亦配以狼尾草以襯托飛鵝山及獅子山的壯麗景色。

The Kai Tak Cruise Terminal Park is located at the rooftop of the Kai Tak Cruise Terminal. It covers an area of 23,000 m<sup>2</sup> with facilities including a central lawn, water garden and fountain plaza. The park offers spectacular 360 degrees panoramic views of Hong Kong Island, Victoria Harbour and Kowloon, as well as the stunning views of the nearby Kowloon Peak and Lion Rock complemented by the Purple Fountain Grass planted on the deck.

## 牛棚藝術公園

*Cattle Depot Art Park*

佔地 7,000 平方米的牛棚藝術公園位於土瓜灣，是香港碩果僅存的戰前牛隻屠房一部分，另一部分現已被翻新和改建為藝術村。古物諮詢委員會於 2009 年把牛棚評為二級歷史建築。

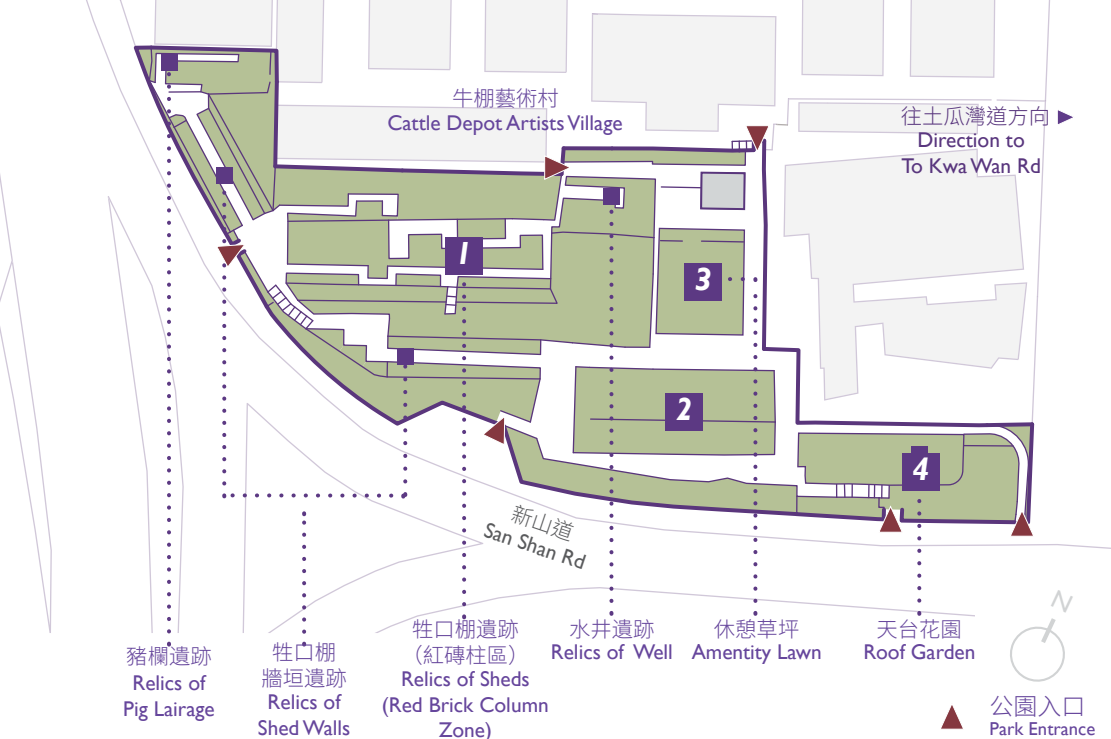

Occupying an area of 7,000 m<sup>2</sup>, the Cattle Depot Art Park, located at To Kwa Wan, is part of Hong Kong's only surviving pre-war cattle slaughterhouse, with the remaining part of which was renovated into an Arts Village. The depot was confirmed a Grade II historic building by the Antiquities Advisory Board in 2009.

牛棚藝術公園

Cattle Depot Art Park

在牛棚停止營運後，原有的棚柱和飲食槽仍被保留。四周的植物在當中滋蔓生長，逐漸形成建築結構與大自然交纏結合的奇妙形態。

When the Cattle Depot ceased operation, the columns of the sheds and the feeding troughs remained and they were eventually taken over by the surrounding vegetation, resulting in an intriguing composition of architectural structure and nature.

紅磚牆和以混凝土作結構柱的牲口棚被保留下來。飲水槽底部的金屬環用於繫綁牛隻。

Shed with red brick wall and concrete columns were preserved. The metal rings in front of the feeding trough were used for tying cattle.

筆管榕  
*Ficus subpisocarpa*

花 / 果期 Flowering/ Fruiting Period

細葉榕  
*Ficus microcarpa*

花 / 果期 Flowering/ Fruiting Period

此公園主要的榕屬樹有筆管榕和細葉榕。大小適中的榕果是雀鳥最喜歡的食物，有利種子散播。

The major Ficus species found in this Park are *Ficus subpisocarpa* and *Ficus microcarpa*. The moderate size of Ficus fruits make them favourite food for birds which help disperse seeds.

圍欄上以金屬片形成豬、牛等有趣造型，以展示當年屠房的情況。

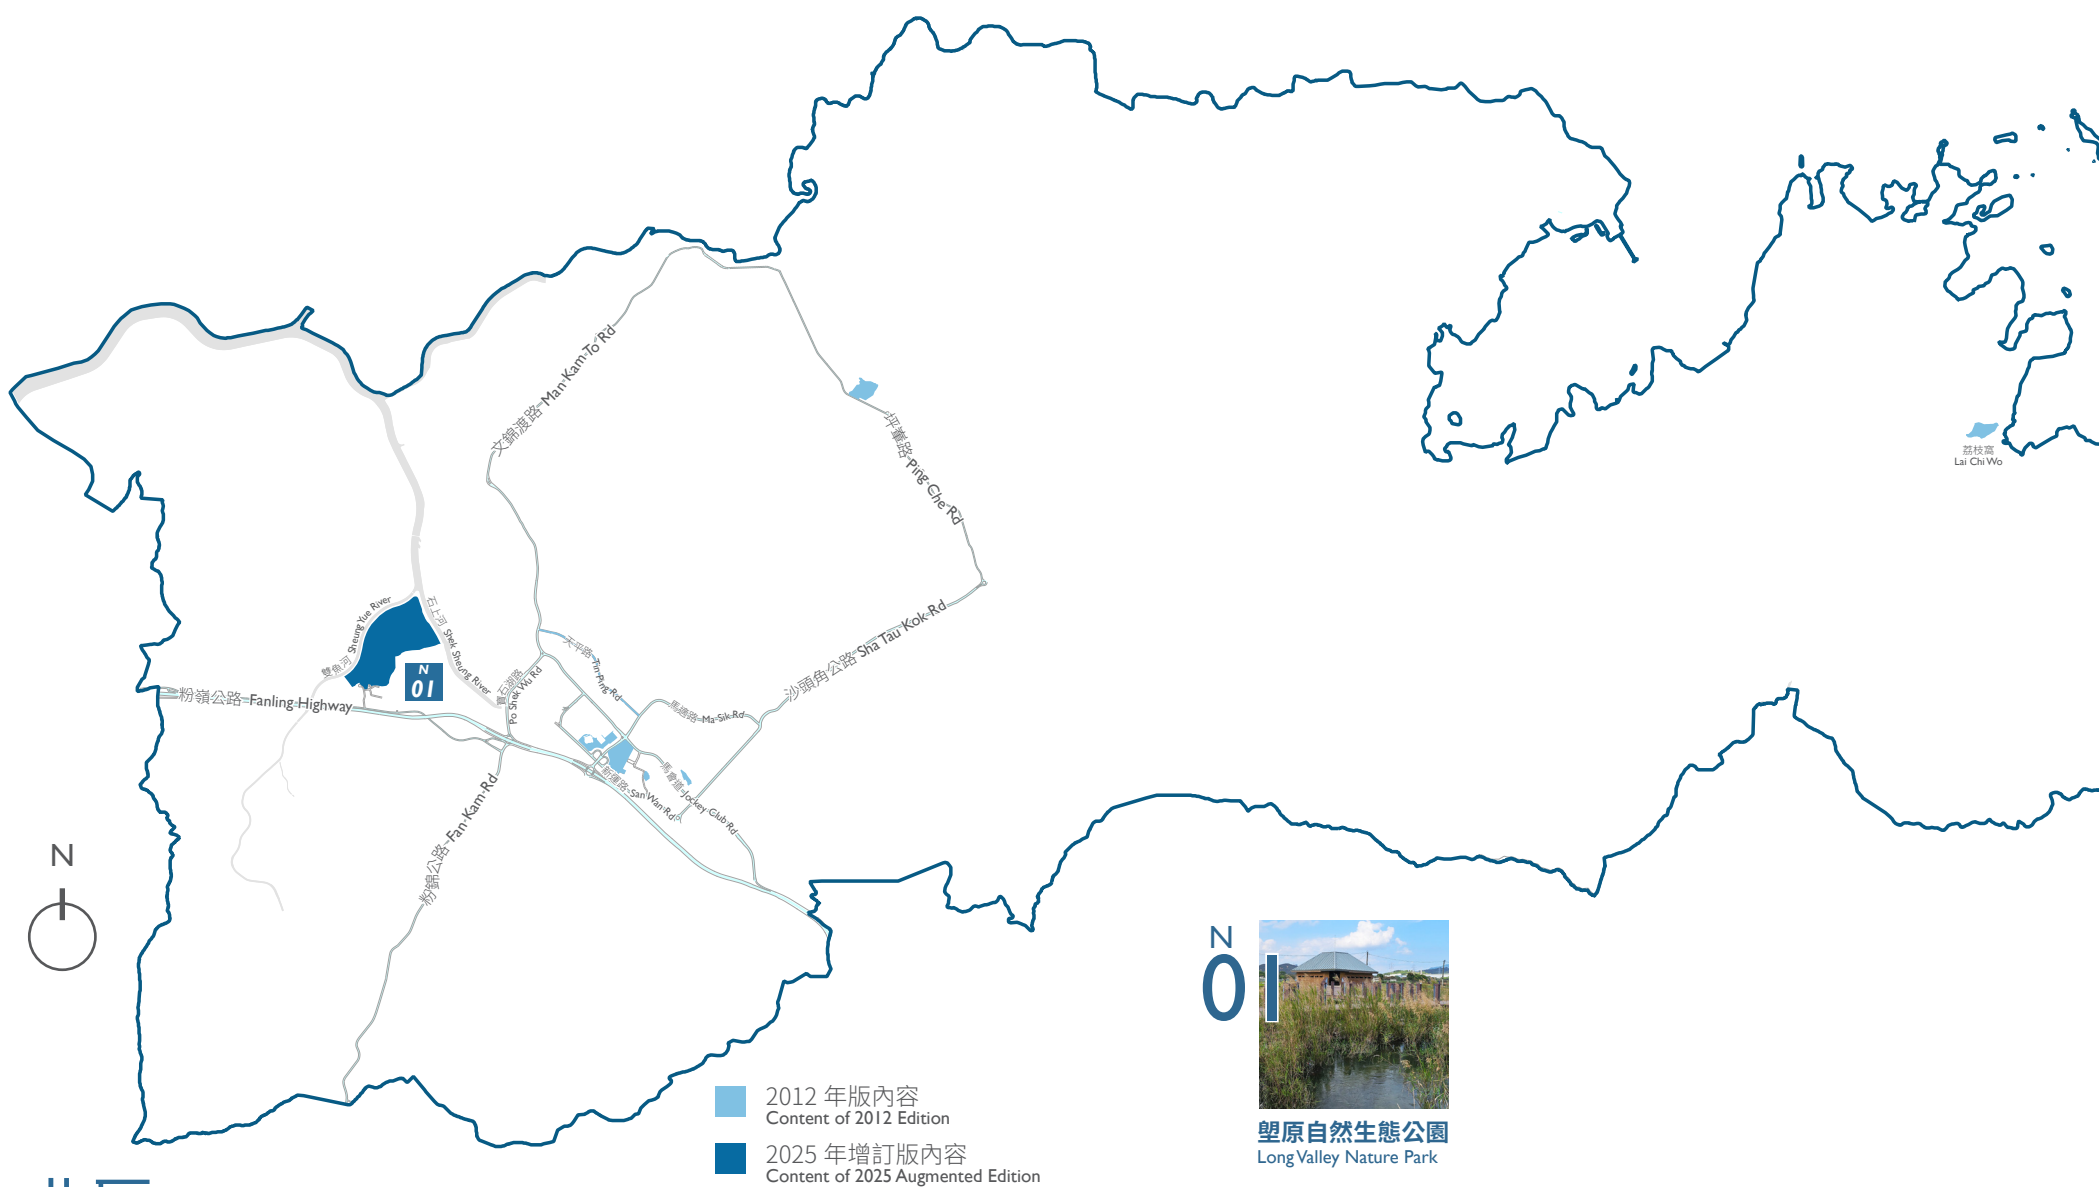

Metal plates on the fences are incorporated with interesting decorations, such as pigs and cows, telling the story of the former slaughterhouse.

間隔砌磚法是日漸流行的建築方式，展示紅磚的質感及紋理。磚與磚之間的罅隙既通風又可種植，營造更柔和的效果。

"Hit and miss" brickwork is an increasingly popular type of masonry displaying the texture and pattern of the red bricks. The gaps between bricks allow aeration and planting.

## 北區 North District

北區擁有豐富多元的綠化景觀及生態網絡，涵蓋郊野公園、濕地、河岸走廊、傳統鄉村及新市鎮。區內的自然與文化景觀相互交融，既有保育價值高的自然生境，亦有結合社區需求的綠化建設，並為居民提供優質的生活環境與休憩空間。

The North District is endowed with a rich and diverse verdant landscape and ecological network, encompassing country parks, wetlands, river corridors, traditional villages, and new towns. Natural and cultural landscapes blend seamlessly within the district, featuring both natural habitats with high conservation value and green infrastructure tailored to community needs as well as providing residents with high-quality living environment and recreational spaces.

## 塋原自然生態公園 Long Valley Nature Park

位於雙魚河與石上河之間的塋原自然生態公園（公園）面積約 37 公頃，分為三個管理區域：訪客區、生態區及農業區，結合濕地保育、農耕作業與自然教育於一身。公園不僅為市民提供親近自然的空間，更是一片具高生態價值的淡水濕地。土木工程拓展署與保育團體經過多年努力，建設工程於 2019 年底展開，並於 2024 年 11 月開放予公眾參觀。公園現時由漁農自然護理署（漁護署）負責管理。

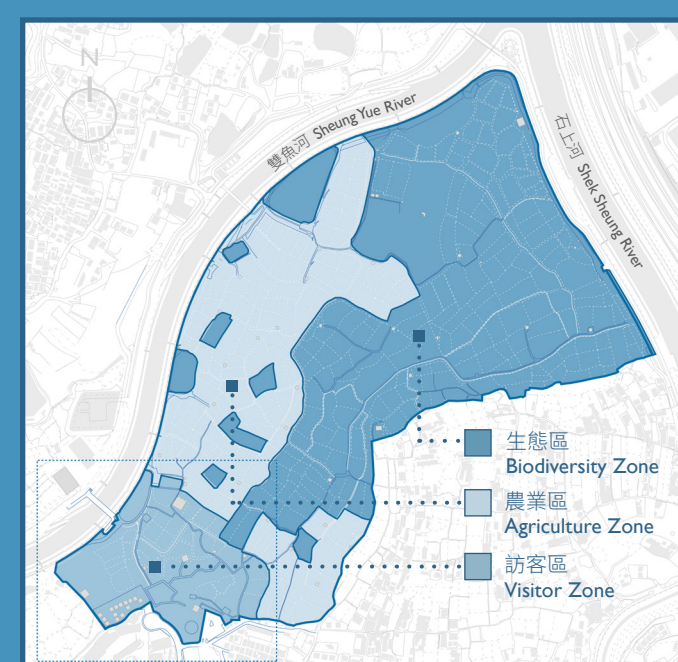

The Long Valley Nature Park (LVNP), located between the Sheung Yue River and the Shek Sheung River covers approximately 37 hectares and is divided into three management zones, namely the Visitor Zone, Biodiversity Zone and Agriculture Zone. It combines wetland conservation, farming operations and nature education. The park not only allows people to get closer to nature, but also provides a large freshwater wetland with high ecological value. With joint efforts of the Civil Engineering and Development Department and the conservation groups, the park construction started at the end of 2019, and opened to the public in November 2024. LVNP is now managed by the Agriculture, Fisheries and Conservation Department (AFCD).

N

塋原自然生態公園

Long Valley Nature Park

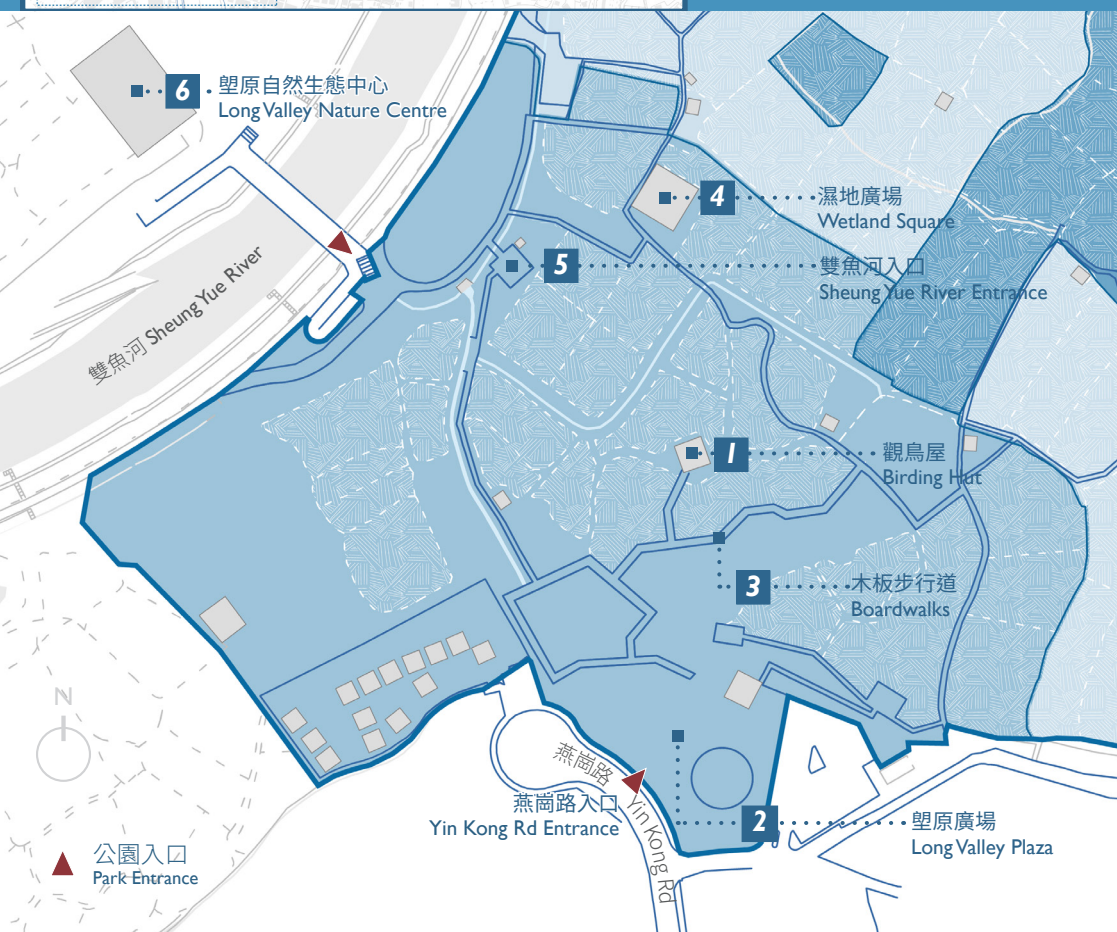

## 昔日塱原 Before the LVNP

作為香港昔日的農業區，塱原在 1970 年代之前以水稻種植為主。在河上鄉週邊區域，分佈大量魚塘和紅蟲及水滋的養殖塘。隨著 1970 年代香港經濟轉型，傳統水稻農業衰退，塱原的農業生產亦逐步從水稻田轉型為蔬菜種植。

As one of Hong Kong's former agricultural areas, Long Valley was primarily focused on rice cultivation before the 1970s. Numerous fish ponds and aquaculture ponds with bloodworms and water fleas were scattered across the Ho Sheung Heung area. With Hong Kong's economic transformation in the 1970s, traditional rice farming declined, and Long Valley's agricultural production gradually shifted from paddy fields to vegetable cultivation.

## 訪客區 Visitor Zone

佔地約 5 公頃，設有供觀鳥用的觀鳥屋、木板步行道及可進行各類活動的濕地廣場和塱原廣場。

Covering an area of about 5 hectares, the zone features the Birding Hut for bird watching, boardwalks, the Wetland Square and the Long Valley Plaza designed for various activities.

## ■ 訪客區 Visitor Zone

公園舉辦各種自然教育活動，如導賞團及手作工作坊等，吸引不少市民和學生參與。這些活動不僅提高公眾對生態保育的認識，也讓人了解到濕地生態系統的重要性。

The park organises a variety of nature education activities, such as guided tours and handcrafting workshops, attracting many citizens and students to participate. These activities not only raise public awareness of ecological conservation, but also deepen their understanding on the importance of wetland ecosystem.

## ■ 生態區 Biodiversity Zone

生態區佔地約 21 公頃，設有不同的濕地生境，包括濕田、水滋田、淺水池和沼澤等供雀鳥及其他野生動物棲息。

Covering approximately 21 hectares, the Biodiversity Zone features diverse wetland habitats, including wet agricultural fields, water flea ponds, shallow water habitats, and marshes that provide thriving habitats for bird species and other wildlife.

## 公園的鳥類 Birds of the Park

東亞石鵲  
*Saxicola stejnegeri* (Amur Stonechat)

小鵝鵝  
*Tachybaptus ruficollis* (Little Grebe)

斑文鳥  
*Lonchura punctulata* (Scaly-breasted Munia)

池鷺  
*Ardeola bacchus* (Chinese Pond Heron)

黑水雞  
*Gallinula chloropus* (Common Moorhen)

小白鷺  
*Egretta garzetta* (Little Egret)

淺水池中央設有鳥島，為雀鳥提供隱蔽處築巢，避免受到陸上動物滋擾。遊客可以近距離觀察多種鳥類，成為攝影愛好者和自然愛好者的熱門地點。

At the centre of some shallow water habitats lies a specially designed bird island, offering safe nesting grounds for birds and protecting them from disturbance by terrestrial animals. This unique feature allows visitors to observe diverse bird species at close quarters, making it a favourite destination for wildlife photographers and nature enthusiasts.

## ■ 農業區 Agriculture Zone

農業區佔地約 11 公頃。區內農田會租予當地農戶經營生態友善耕作，以維持塋原豐富的生物多樣性。

The Agriculture Zone covers approximately 11 hectares. The farmland is leased to local farmers for eco-friendly farming practices, helping to preserve Long Valley's rich biodiversity.

## 濕地植物 Plants in Wetland

### 稻米

*Oryza* spp. (Rice)

種植稻米由插秧至稻米成熟大約需要 100 日。公園每年分別於 3 月及 6 月種植早造米和晚造米。而兩造稻米會由 6 月及 10 月起開始成熟，能配合候鳥遷徙的時間，為牠們提供食物。

Cultivation of rice takes about 100 days from seedlings to ripe. The park plants rice in two rounds per year in March and June respectively. The first round of rice will start to ripe from June and the second round from October, which can match the visiting time of migratory birds to provide them with food.

### 蘆葦

*Phragmites australis* (Common Reedgrass)

蘆葦是重要的濕地植物，不但為野生動植物提供棲息地，同時能夠吸取水中過量的養分及阻隔懸浮物，從而淨化水質。

*Phragmites australis* is an important wetland plant that provides habitats for wildlife. It can also absorb excessive nutrients in water and block suspended solids to purify water.

黃胸鵪

*Emberiza aureola* (Yellow-breasted Bunting)

長趾濱鷸

*Calidris subminuta* (Long-toed Stint)

公園內多樣的生境，例如稻田和沼澤等，為鳥類提供重要的覓食、繁殖和棲息地。每年冬季，過千隻候鳥從北方飛來此處過冬，包括黑臉琵鷺、林鵪、鴨和鷺鳥等。同時，公園也是其他遷徙鳥類如黃胸鵪及長趾濱鷸等的重要補給站。

The park's diverse habitats, such as paddy fields and marshes, provide an important foraging, nesting, and resting ground for birds. Each winter, over a thousand birds, including Black-faced Spoonbills, Wood Sandpipers, ducks, egrets and herons, migrate from the north to overwinter here. The park also serves as a vital stopover site for other migratory birds like Yellow-breasted Buntings and Long-toed Stints.

為降低水浸風險並便於農戶灌溉，公園內設有 1.9 公里長的灌溉水道。水道採用石籠構築，與周邊自然環境和諧融合。

To address flood risks and facilitate irrigation for farmers, a 1.9-kilometre-long irrigation channel has been constructed within the park. Built with gabions, the channel blends seamlessly with the surrounding natural environment.

## 離島區 Islands District

離島區是一個充滿自然美景和獨特風貌的地區。不但有壯麗的山脈和寧靜的海灣，還擁有許多獨特的景點、文化遺產及現代化的國際機場。近年，香港機場管理局積極美化香港國際機場附近環境，栽種各種季節性植物，供市民及訪客觀賞拍照。

The Islands District is an area full of natural beauty and unique characteristics, not only does it feature magnificent mountains and serene bays, but it also has many distinctive attractions, cultural heritage sites, and a modern international airport. In recent years, Airport Authority Hong Kong has been actively enhancing the landscape around the Hong Kong International Airport (HKIA), offering citizens and visitors new photo spots featuring seasonal plants.

# 櫻花園

## Cherry Blossom Garden

位於赤鱗角南路的櫻花園內種植了數十棵櫻花（好運來）。每逢春天櫻花綻放，將交織成夢幻的粉色櫻花大道，成為市民與旅客的賞櫻熱點。

Located along Chek Lap Kok South Road, the Cherry Blossom Garden features dozens of cherry blossom trees (*Cerasus campanulata* 'Haoyunlai'). These trees form a dreamy pink pathway during spring and have become a hotspot for both locals and tourists.

遊人可於櫻花海岸悠閒地欣賞東涌灣與纜車美景。

Cherry Blossom Bay offers a spot for visitors to enjoy the views of Tung Chung Bay and cable cars in a leisure manner.

櫻花（好運來）  
*Cerasus campanulata* 'Haoyunlai' ('Haoyunlai' Cherry Blossom)

花期 Flowering Period

由鐘花櫻桃培育的新品種，能適應香港氣候，花期時花簇繁茂，絢麗壯觀。花期約 7 至 14 天。

It is a new cultivar bred from *Cerasus campanulata* that thrives in Hong Kong's climate. The flowering period typically lasts between 7 to 14 days, and the blooms are glamorous and strikingly beautiful.

## 黃花風鈴徑 Golden Trumpet Trail

黃花風鈴徑位於過路灣路旁，沿路種了逾 260 棵黃花風鈴木。每年春天金黃色繁花綻放時，會為機場島增添生機與色彩。

The Golden Trumpet Trail is located near the Kwo Lo Wan Road, featuring more than 260 *Tabebuia chrysantha*. Their golden blooms create a radiant display that enhances the airport island's vitality during spring.

鄰近機場的獨特位置，讓遊人可捕捉飛機升降與金黃花海交織的獨特畫面。

Its unique location near the airport allows visitors to capture the striking contrast of airplanes taking off against a backdrop of golden blooms.

## 香港國際機場古物園及古窯公園 HKIA Historical Garden and Ancient Kiln Park

香港國際機場古物園及古窯公園毗鄰黃花風鈴徑。其中古窯公園保存了元代時期的鑄爐遺跡，園內結合自然景觀與歷史文化，是打卡及探索機場歷史的理想地點。

The HKIA Historical Garden and Ancient Kiln Park are adjacent to the Golden Trumpet Trail. The Ancient Kiln Park preserves relics of a Yuan Dynasty furnace. Blending natural scenery with cultural heritage, this place offers a peaceful retreat for photo-taking and exploration into the past of the airport.

古物園內展出了巨型機械零件，如航油管道鋪設工程的鑽頭及工程船的拌合葉片，讓遊人探索機場的建造過程。

In addition, the HKIA Historical Garden features large-scale mechanical parts, such as drill bit for installation of aviation fuel pipelines and barge mixing blade, allowing visitors to explore the airport's construction process.

園內不僅設有健身設施及瑜伽平台，更連接機場緩跑徑，成為集運動、探索與休憩於一體的特色空間。

The garden not only has fitness equipment and a yoga area, it is also connected to the Airport Trail, making it a unique space that integrates sports, exploration and relaxation.
